PRODUCT ENGINEERING

PUBLISHED MONTHLY

McGRAW-HILL PUBLISHING COMPANY, INC. 330 West 42nd Street, New York 18, N. Y.

INDEX TO VOLUME 14

January to December, 1943

January 1– 62
February 63–126
March 127–190
April 191–254
May 255–326
June 327–394
July 395–466
August 467–538
September 539–610
October 611–682
November 683–748
December 749–828

* ILLUSTRATED

A

Accounting system aids plane production scheduling. Paul Sheets.....*400
Adhesive applicators for high-speed machines, pt. 1, *106; pt. 2.....*174

AIRCRAFT:

Accounting system aids plane production scheduling. Paul Sheets...*400
Aircraft sheet metal shapes. L. D. Dame, pt. 1, *558; pt. 2.....*633
Auxiliary fuel tanks assembled by welding *479
Bead designs studied for standardization. F. M. Mallett.....*708
Cargo planes of plywood save vital materials *73
Compressed gas actuator for aircraft.*144
Coordinated program conserves aircraft materials *755
De-icers controlled by electronic device *80
Electrical aircraft systems reduce vulnerability of planes. C. J. Breitwieser *778
Flight testing apparatus, pt. 1, *395; pt. 2 .....*512
Hydraulic remote control for aircraft engines *18
Liberator B-24 fuselage nose section output boosted *476
Lightweight materials used for airplanes compared. Fletcher Platt..*67
Modified standard thread for primary aircraft structures. Mario Di Giovanni *641
Mosquito bomber design. R. B. McIntyre *683
Mosquito bomber details.....*767
New adhesive protects plastics for aircraft 244
Number of drawings made for one plane 244
Permanent buckling strains in flat compression panels. F. N. Platt..*211
Pilot seats of plastics.....*143
Plywood in aircraft design.....*149
Protective coatings for aluminum parts of military aircraft.....99
Torsion analysis of open shell structures. E. H. Spaulding, pt. 2.....*25
Transparent aircraft inclosure design. A. C. Foster, pt. 1, *260; pt. 2.....*354
Unground bearings used in aircraft design. W. H. Korff.....*488
Visualizing in three dimensions.....*131

ALUMINUM:

Aluminum alloy drawn cylindrical shapes. T. H. Hazlett.....*425
Aluminum castings dimensions.....*234
Deformation under pressure of brazed aluminum tank. L. W. Combs.....*581
Drawn box shapes of various aluminum alloys. T. H. Hazlett.....*517
Finishing aluminum parts for military aircraft 99
Safe beam loading for aluminum tubes. Marshall Holt *36
Testing aluminum parts for working temperatures. R. G. Anderson....*786
Tubular aluminum beam loading. Marshall Holt *36
Arc-welded design helps reduce weight of large diesel engines.....*176
Automotive design techniques in production of ordnance.....*467

B

Babbitting of cast iron improved by new process *228
Battery charger *20
Beads in sheet aluminum aircraft parts studied for standardization. F. M. Mallett *708
Beams, stress formulas for non-homogeneous types. G. W. De Bell.....*782

BEARINGS:

Bearing design data. M. F. Spotts (Ref. Bk. Sheets).....*253
Design of self-cooled journal bearings. M. F. Spotts, pt. 1, *231; pt. 2.....*307
Design of sleeve bearings by hydrodynamic theory. H. W. Hamm....*422
Hydro-dynamic formulas useful in bearing design. H. W. Hamm (Ref. Bk. Sheets) 464
Underground bearings used in aircraft design. W. H. Korff.....*488
Stampings eliminate machining in roller bearing retainers. R. R. Killian *504
Binocular mount *763
Black coatings for non-ferrous metals. W. R. Meyer 1792
Black-oxide coatings, Weisberg & Parker.*294
Bolts and screws—torque-stress-load relationship. A. H. Korn (Ref. Bk. Sheets) *752
Bomb fuzes tested in wind tunnel. A. L. Atherton *95
Boring mill machines tank turrets.....*76
Brazed and soldered joints made possible by induction heating. J. P. Jordan..*102
Brazing aluminum reservoir tank for airplane. L. W. Combs.....*581
Brittle lacquer method tests stress analysis of engines. R. G. Anderson....*611
Bronze—chart for downgrading..... 236
Buckling strains, permanent—in compression panels. F. N. Platt.....*211

C

Cable, couplers, redesigned.....*264
Calculating design stress—effect of material and leading. G. H. Neugebauer *31
Camouflage is a design problem..... *7
Canadian Armament designs. James Montagnes *327
Canadian descriptions—Canadian tank periscope replaces aluminum with zinc and plastics.....*413
Castings — aluminum castings — recommended dimensions *234
Centrifugally cast small parts.....*549
Designing die-castings. Herbert Chase, pt. 1, *237; pt. 2, *303; pt. 3 .....*377
High strength cast irons for machinery parts *659
Iron castings replace forgings for highly-stressed parts *161
Small precision parts castings.....*481
Steel castings for present and postwar products *717-732
Causes and cures.....35, 101, 173, 227, 291, 353, 429, 503, 785
Clock, electronic *812
Clutch and brake facings of powdered metal. Adler, Aufmuth & Lowey...*218
Color specification and description by the American Standards Associati n... *91
Columns designed for minimum weight, tapered and stepped. A. H. Church.*499
Committee for Economic Development—how designers can benefit through. C. E. D. activities.....*539
Compressed gas actuator for aircraft.....*144

CONSTRUCTION TYPES AND ASSEMBLY METHODS:

Advantages and limitations of die-forged machine parts. C. L. Tutt, Jr. *521
Advantages of square tubing.....*418
Aircraft sheet metal shapes. L. D. Dame, pt. 1, *558; pt. 2.....*633
Arc-welded design helps reduce weight of large diesel engines.....*176
Automotive design techniques in mass production of ordnance.....*467
Babbitting of cast iron improved by new process *228
Bead designs studied for standardization *708
Better brazed and soldered joints made possible by induction heating. J. P. Jordan.....*102
Canadian armament redesigns. James Montagnes *327
Deformation under pressure of brazed aluminum tank. L. W. Combs.....*581
Designing die-castings. Herbert Chase, pt. 1, *237; pt. 2, *303; pt. 3 .....*377
Die-formed sheet steel replaces cast aluminum in Army searchlight....*333
Drawn cylindrical shapes of various aluminum alloys. T. H. Hazlett...*425
Electrostatic high-frequency heating makes possible many new designs..*40
High-strength cast irons for machinery parts *659
Magnesium parts design and machining *374
Magnetic brakes and their characteristics. A. C. Prescott.....*292
Mosquito bomber. R. B. McIntyre...*683
Nazi ordnance materiel design.....*255
Plywood in aircraft design.....*149
Production metal spraying offers economies in design.....*795
Redesigns to conserve materials, machines and manpower. J. H. Staak.*561
Reinforcement of nozzles in pressure vessels. E. L. Maguire (Ref. Bk. Sheets) 393
Rules for die-forging show limits in design. C. L. Tutt, Jr.....*576
Shrink fit tolerances for various metals and needs.....*214
Signal Corps designs new devices....*195
Steel castings for present and postwar products *717-732
Transparent aircraft inclosure design. A. C. Foster, pt. 1, *260; pt. 2.....*354
Types of keys and keyways—their relative merits. A. H. Korn.....*242
Wartime developments in powdered metal parts *472
Conveyor systems for production machines. pt. 1, *298; pt. 2.....*436
Corrosion causes and cures in fine wire magnet coils. B. W. Erikson.....*158
Crane for airfields.....*142

D

DESIGN, CALCULATIONS AND STRESS ANALYSIS:

Aircraft sheet metal shapes. L. D. Dame, pt. 1, *558; pt. 2.....*633
Airplanes constructed of light-weight materials. Fletcher Platt.....*67
Bead designs studied for standardization. F. M. Mallett.....*708
Bearing design data. M. F. Spotts..*253
Coordinating standards work with design and production. B. C. Boulton *565
Design of highly stressed studs to improve their fatigue strength.....*288
Design of self-cooled journal bearings. M. F. Spotts, pt. 1, *231; pt. 2....*307
Design of sleeve bearings by hydrodynamic theory. H. W. Hamm.....*442
Designing die-castings. Herbert Chase, pt. 1, *237; pt. 2, *303; pt. 3 .....*377
Designing with magnesium, pt. 1, *276; pt. 2, *359; pt. 3, *430; pt. 4, *493; pt. 5.....*568
Dimensioning to control sizes and to reduce scrap loss. S. C. Bliss.....*108
Drafting practices in use of title blocks *284
Drawn box shapes of various aluminum alloys. T. H. Hazlett.....*517
Effect of material and loading in calculating design stress. G. H. Neugebauer *31
Effects of residual stress on the fatigue of metals. J. O. Almen. *348
Engineering accounting system aids plane production scheduling. Paul Sheets *400
Heat transfer problems solved by electrical analyzer *442

Higher degree equations solved by recurrent methods. W. A. Douglas II *451
Higher degree equations solved by "trial and error." H. A. Bolz.....*217
How to dimension perspective drawings *790
Hydro-dynamic formulas useful in bearing design. H. W. Hamm (Ref. Bk. Sheet) 464
Impact loads determined by Brinell technique. L. D. Hagenbook.....*300
Measurement of stresses in parts and structures. R. G. Anderson.....*712
Modified standard thread for primary aircraft structures. Mario Di Giovanni *641
Nazi ordnance material design.....*255
Organizing a graphic illustration department. Gonzales & Wiese.....*366
Permanent buckling strains in flat compression panels. F. N. Platt..*211
Properties of rectangular sections at any angle (Ref. Bk. Sheets).....*188
Rapid release latches analyzed for performance. Carl Thumin.....*740
Recommended dimensions for aluminum castings *234
Rectangular moments of inertia and section Moduli (Ref. Bk. Sheet).... *61
Redesigns to conserve materials, machines and manpower. J. H. Staak.*561
Rendering and reproducing graphic illustrations. Gonzales & Wiese....*665
Rules for die-forging show limits in design. C. L. Tutt, Jr.....*576
Safe beam loading for aluminum tubes. Marshall Holt..... *36
Shrink fit tolerances for various metals and needs.....*214
Spring material substitutes have unconsidered qualities. W. W. Boyd..*112
Statistical handling of laboratory data. E. U. Condon..... 615
Stress concentration factors and their effect on design. G. H. Neugebauer, pt. 1, *82; pt. 2.....*168
Stress formulas for non-homogeneous beams. G. W. De Bell.....*782
Stress in straight pipes under internal pressure. H. W. Hamm (Ref. Bk. Sheets) *125
Tapered and stepped columns designed for minimum weight. A. H. Church *499
Testing aluminum parts for working temperatures. R. G. Anderson.....*786
Testing designs by the brittle lacquer method. R. G. Anderson.....*611
Torque-stress-load relationship in bolts and screws. A. H. Korn (Ref. Bk. Sheets) *752
Types of keys and keyways—their relative merits. A. H. Korn.....*242
Vacuum-cup locks solve vertical lofting problem *222
Visualizing in three dimensions.....*131

DESIGN DESCRIPTIONS:

Airplane landing gear.....*698
Airport runway lighting control switch *268
Autographic registers of plywood and hardwood *337
Automotive design techniques in mass production of ordnance.....*467
Battery charger *20
Bofors funs redesigned.....*266
Binocular mount parts.....*763
Blower, tiny *699
Boring mill machines tank turrets..*76
Cable couplers redesigned.....*264
Carbon and molded rubber seal blower rotors *339
Cargo planes of plywood..... *73
Cast ordnance parts redesigned as welded stampings *206
Chlorine feeder *203
Circuit breakers conserve vital materials *406
Compressed gas actuator for aircraft.*144
Connectors redesigned to save aluminum *205
Crane for airfields, mobile stiff leg...*142
De-icers controlled by electronic device *80
Door hinge, self-aligning.....*147
Drill press—belt tension balances drill spindle *21
Electric drill replaces aluminum housing with plastic.....*408
Electric induction heating used to plate steel with tin..... *16
Electronic control conserves paint...*621
Electronic sealing machine.....*411
Electronic speed control.....*412
Expansion guns, hydraulically-operated, speed welding.....*210
Extruded plastic hinges save metal..*210
Film drying equipment.....*696
Fire-pumper, mobile *12
Flight test apparatus radios from plane to group, pt. 1, *395; pt. 2..*512
Flush valve made of plastics to save copper *270
Gages of glass conserve critical tool steel *141
Garand rifle sighting is checked by optical device *410
Grinder, internal *693
Hydraulic control for aircraft engines *18
Hydraulic test stand for testing aircraft *483
Jeep or Willys Model MB truck.....*543
Liberator B-24 fuselage nose section.*476
Lofting mouse saves time in drawing straight lines *24
Manhole cover, welded..... *81
Marine tractor unit fills tug shortage.*208
Mosquito bomber details.....*767
Ordnance redesigns save scarce metals *338
Photo-electric eye guards press.....*482
Pin bracket redesigned.....*343
Piston of plastics.....*271
Plastic materials application.....*204
Pilot seats of plastics.....*143
Redesigned ordnance speeds Detroit production *546
Refrigerator, portable, for U. S. Navy *625
Rifle trigger guard.....*624
Riveting aircraft simplified with bucking bars *78
Rivet ejector *148
Rubber parts replaced by felt..... ..*205
Sander portable electric.....*340
Spray nozzle of polystyrene.....*623
Steam engines for liberty ships.....*138
Sten machine gun design.....*618
Surface plate of constant temperature, reduce gaging rejects.....*342
Thermoplastic parts *699
Tiny precision parts cast centrifugally *481
Transformer, redesigned for resistance to air flow.....*409
Vacuum breaker redesigned.....*270
Valve, welded *81
Vapor degreaser *697
Water works emergency equipment..*203
Welding equipment, specially designed, assembles auxiliary fuel tanks for planes.....*479
Welding thin sheet stainless steel into water storage tanks.....*622
Wood joints increase strength by use of steel ring connectors.....*271
X-ray table, portable.....*200
Die-casters certified 345
Die-forged machine parts. C. L. Tutt, Jr..*521
Die-forging rules show limits in design. C. L. Tutt, Jr.....*576
Door hinge, self-aligning.....*147
Drafting—design practices in use of title blocks *284
How to dimension perspective drawings *790
Lofting mouse saves time in drawing straight lines *24
Lofting duck replaced by vacuum-cup spline-locking device *222
Organizing a graphic illustration department. Gonzales & Wiese.....*366
Technique and reproduction methods. Gonzales & Wiese.....*665
Visualizing in three dimensions.....*131
Drawn box shapes of various aluminum alloys. T. H. Hazlett.....*517
Drawn cylindrical shapes of aluminum alloys. T. H. Hazlett.....*425
Drill press *21

E

EDITORIALS:

"Engineering is management . . ."... 703
It's time for cleaning house..... 553
No one material can be best..... 347
Petty bickering never won a victory. 629
Pitfalls in post-war designing..... 191
Planning for post-war products..... 417
Post-war prospects for engineering design .....Jan. 1
Prepare now for post-war era..... 487
Professional status after the war.... 127
Professionals without a profession... 773
Proposal to nationalize research..... 275
To help our neighbors to the South.. 63

ELECTRIC HEATING:

Electrostatic high-frequency heating makes possible many new designs.. *40
Induction heating for the disposition of tin on steel..... *16
Joints soldered or brazed by induction heating. J. P. Jordan.....*102

ELECTRIC MOTORS, CONTROLS AND DEVICES:

Airport runway lighting control switch *268
Better magnetic core steel aids transformer engineer. C. C. Horstman.. *28
Common types of magnetic brakes and their characteristics. A. C. Prescott *292
Corrosion causes and remedies in fine wire magnet coils. B. W. Erikson.*158
Design of electrical contacts for trouble-free service. J. D. Kleis.....*733
Electric motors for present and post-war products *799
Electrical aircraft systems reduce vulnerability of planes. G. J. Breitwieser *778
Electron tubes available for industrial functions *554
Electronic controls for industrial machines. A. E. Bailey, Jr.....*760
Electronic device for de-icers..... *80
Electronics for present and post-war products *63–658
Magnet coil life as affected by higher operating temperature. G. L. Moses *22
Metal rectifier characteristics. I. R. Smith *380
Operating characteristics of electric motor drives. L. H. Berkley.....*370
Wiring diagram symbols (Ref. Bk. Sheets) *537
Electrical analyzer solves heat transfer problems *442
Electrical contacts design for trouble-free service. J. D. Kleis *733
Electrostatic high-frequency heating..... *40
Engine, large diesel, arc-welded.....*176
Engineering department, manpower problems *704
Engineering organization for post-war product development *774
Equations, higher degree, solved by recurrent methods. W. A. Douglas, II.*451
Equations of higher degree, solved by "trial and error." H. A. Bolz.....*217
Engineering records aid production scheduling. Paul Sheets.....*400

F

FASTENINGS:

Deformation under pressure of brazed aluminum tank. L. W. Combs....*581
Magnesium forming properties and design of joints *574
Modified standard thread for primary aircraft structures. Mario Di Giovanni *641
Torque - stress - load relationship in bolts and screws. A. H. Korn (Ref. Bk. Sheets).....*752

FINISHES:

Advantages and limitations of black-oxide coatings. Weisberg & Parker*294
Characteristics of black coatings for non-ferrous metals. W. R. Meyer..*792
Factors governing the selection of baking finishes *689
Common language of new standard simplifies color specification..... *91
Dimensional painting machines decreases accidents *520
Indium surface alloys resist corrosion and wear *630
Protective coatings for aluminum parts of military aircraft..... 99
Fire-pumper, mobile *12
Finishing aluminum parts for military aircraft *99

FORGING:

Advantages and limitations of die-forged machine parts. C. L. Tutt, Jr. *521
Rules for die-forging show limits in design. C. L. Tutt, Jr.....*576

G

Gages of glass conserve tool steel.....*141
Gaskets of coated copper mesh..... 452
Gaskets and washers of felt.....*205
Gears—Epicylic gear trains. M. F. Spotts (Ref. Bk. Sheets).....*609
Glass fibers serve as reinforcement agent.*784
Graphic illustration department-organizing. J. Gonzales, R. R. Wiese.....*366
Graphic illustrations—rendering and reproduction methods. John Gonzales and R. R. Wiese.....*664

H

Higher degree equations solved by "trial and error." H. A. Bolz.....*217
Higher degree equations solved by recurrent methods. W. A. Douglas, II..*451

HYDRAULIC DRIVES, UNITS, CONTROLS AND DEVICES:

Aircraft engines remote-controlled by hydraulics *18
Alignment chart for determining flow characteristics of hydraulic fluid in tubes *358
Circuit diagrams of hydraulic transmissions *738
Expansion guns, hydraulically-operated speed welding.....*210
Forms of pumps used in hydraulic circuits *636
Types of valves used in hydraulic transmissions *510
Unit for testing aircraft hydraulic systems *483

I-J

Impact loads determined by Brinell technique. L. D. Hagenbook.....*300
Indium surface alloys resist corrosion.....*630
Induction heaters for tin plating.....*492
Insulation—corrosion causes and remedies in fine wire magnet coils. B. W. Erikson *158
Iron, high-strength cast, for machinery parts *659

Iron castings replace forgings for highly stressed parts *161
Jeep or Willys Model M.B. truck.....*543
Joints soldered or brazed by induction heating. J. P. Jordan.....*102

K L

Keys and keyways. A. H. Korn.....*242
Laboratory data, statistical handling. E. V. Condon *615
Latches, rapid release analyzed. Carl Thumim *740
Lead-coating instead of zinc coating hardware for telegraph poles.....*282
Linkages for converting short motions or impulses *38
Lofting duck replaced by vacuum-cup spline-locking devices *222
Lofting mouse saves time in drawing straight lines *24
Lubrication—Selecting lubricants for industrial applications *447

M

MAGNESIUM:
Designing with magnesium, pt. 1 *276; pt. 2, *359; pt. 3, *430; pt. 4, *493; pt. 5.....*568
Forming properties and design of joints *574
Parts design and machining.....*374
Specifications and compositions of magnesium alloys (Ref. Bk. Sheets) 326
Typical properties of structural magnesium alloys (Ref. Bk. Sheets).. 325
Magnetic coil life as affected by Higher Operating temperatures. G. L. Moses *22
Magnetic brakes and their characteristics. A. C. Prescott *292
Magnetic core steel aids Transformer Engineer. C. C. Horstman.....*28
Manning Table manpower plan..... 66
Manpower problems in the engineering department (chart) *704
Materials used for light-weight structures —relative merits. Fletcher Platt... *67

MATERIALS (Metals):
Aircraft sheet metal shapes. L. D. Dame, pt. 1, *558; pt. 2.....*633
Chart for downgrading bronze..... 236
Deformation under pressure of brazed aluminum tank. L. W. Combs.....*581
Design of electrical contact for trouble-free service. J. D. Kleis.....*733
Designing die-castings. Herbert Chase, pt. 1, *237; pt. 2, *303; pt. 3.*377
Design of highly stressed studs to improve their fatigue strength.....*288
Designing with magnesium, pt. 1, *276; pt. 2, *359; pt. 3, *430; pt. 4, *493; pt. 5 .....*568
Drawn box shapes of various aluminum alloys. T. H. Hazlett.....*517
Drawn cylindrical shapes of various aluminum alloys. T. H. Hazlett...*425
Effects of residual stress on the fatigue of metals. J. O. Almen....*348
High-strength cast irons for machinery parts *659
Indium surface alloys resist corrosion and wear *630
Iron castings replace forgings for highly stressed parts.....*161
Magnesium forming properties and design of joints *574
New lead-coating process eliminates use of zinc alloy. W. Yonkman...*282
Powdered metal facings for clutches and brakes. Adler, Aufmuth & Lowey *218
Powdered metal parts save strategic metals *115
Specifications and compositions of magnesium alloys (Ref. Bk. Sheets) 326
Square and rectangular steel tubing..*418
Steel castings for present and post-war products *717–752
Tubular parts shaped and ends closed by spinning process *153
Typical properties of structural magnesium alloys (Ref. Bk. Sheets).... 325
Wartime developments in powdered metal parts *472

MATERIALS (Non-metallic):
Nylon—post-war uses *599
Plywood in aircraft design.....*149
Synthetic sapphire production in U. S.*668

MATERIALS (Plastics):
Abrasion resistance of flexible vinyl plastics. F. W. Duggan..... *44
An aid to selecting plastics for electrical applications *165
Applications for plastic materials....*294
Choosing plastic tubing for specific purposes *438
Conservation of plastics needed..... 414
Ethyl cellulose properties and characteristics. Wm. Koch.....*506
Fedralite, new plastic of woody fibers and resin 51
Phenolic-resin boards—properties and applications. Nash & Vaill.....*638
Plastics for present and post-war products *583–598
Synthetic resins as thermosetting materials *223
Transparent aircraft inclosure design. A. C. Foster, pt. 1, *260; pt. 2.....*354
Tygon—a new synthetic corrosion-resistant material *88
Window panes of Lumapane.....*384

MECHANICAL TRANSMISSIONS, UNITS AND PARTS:
A.B.M.A. tentative standard for 20 degree involute fine-pitch system for spur gears (Ref. Bk. Sheets).....*823
Design of sleeve bearings by hydrodynamic theory. H. W. Hamm....*422
Hydro-dynamic formulas useful in bearing design. H. W. Hamm (Ref. Bk. Sheet)..... 464
Rapid release latches analyzed for performance. Carl Thumim.....*740
Stampings eliminate machining in roller bearing retainers. R. R. Kilian *504
Underground bearings used in aircraft design. W. H. Korff.....*488

MECHANISMS AND MACHINE ELEMENTS:
Adhesive applicators for high-speed machines, pt. 1, *106; pt. 2.....*174
Circuit diagrams of hydraulic transmissions *738
Conveyor systems for production machines, pt. 1, *298; pt. 2.....*436
Forms of pumps used in hydraulic circuits *636
Linkages for converting short motions or impulses *38
Magnesium forming properties and design of joints.....*574
Recommended dimensions for aluminum castings *234
Types of valves used in hydraulic transmissions *510
Metal spraying offers economies in design.*795
Moments of inertia and section moduli (Ref. Bk. Sheets)..... *61

MUNITIONS:
Automotive design techniques in production of ordnance.....*467
"Bazooka" gun *627
Bofors gun parts redesigned.....*266
Canadian armament redesigns. James Montagnes *327
Captured enemy small arms..... *65
Conservation in ordnance production (chart) 777
Design of Nazi ordnance material....*255
Garand rifle sighting is checked by optical device *410
Mortar *770
Ordnance redesigns save scarce metals *338
Redesigned ordnance speeds Detroit production *546
Rifle trigger guard.....*624
Rocket *771
Sten machine gun design.....*618
Submachine gun *416
25 years of ordnance progress..... 344

N

Nazi ordnance materiel.....*255
Nozzle of polystyrene.....*623
Nozzle reinforcement in pressure vessels. E. L. Maguire (Ref. Bk. Sheets).. 393
Nugent plan for post-war purchasing.... 128

O

Ordnance conservation in production.....*777
Oxide baths for blackening iron and steel. Weisberg & Parker.....*294

P

PATENTS:
Agitation for patent reform..... 313
More patent reform 64
National Patent Planning Commission reports 484
Phenolic-resin boards—properities and classification. Nash & Vaill.....*638
Photo-electric eye guards press.....*482
Pin bracket, redesigned.....*343
Pipes—stress in straight pipes under internal pressure. H. W. Hamm (Ref. Bk. Sheets).....*125
Plastics—see Materials (Plastics)
Plywood autographic register.....*377
Plywood design practice for maximum strength *149

POST-WAR PLANNING:
Electric motors for present and post-war products *799
Electronics for present and post-war products *643–658
Engineering organization for post-war product development.....*774
How designers can benefit through Committee for Economic Development activities *539
Nylon—post-war uses *599
Planning for post-war products (edit.) 417
Plastics for present and post-war products *583–598
Post-war designing (edit.)..... 191
Post-war prospects for engineering design (edit.) 1
Prepare now for post-war era (edit.). 487
Steel castings for present and post-war products *717
Powdered metal facings for clutches and brakes. M. S. Adler, R. B. Aufmuth, F. J. Lowey.....*218
Powdered metal parts—wartime developments *472
Power linkages for converting short motions or impulses..... *38
Pumps—Forms of pumps used in hydraulic circuits *636

R

Radio recorder transmits readings from plane to ground, pt. 1, *395; pt. 2..*512
Rectangular moments of inertia and section moduli (Ref. Bk. Sheets).... *61
Rectangular section properties at any angle (Ref. Bk. Sheets).....*188
Rectifiers, metal. I. R. Smith.....*380
Redesign of parts to conserve materials, machines and manpower. J. H. Stack *561

REFERENCE BOOK SHEETS:
A.G.M.A. tentative standard for 20 degree involute fine-pitch system for spur gears.....*823
Bearing design data. M. F. Spotts..*253
Epicyclic gear trains. M. F. Spotts..*609
Helical compression springs. C. P. Nachod *681
Hydro-dynamic formulas useful in bearing design. H. W. Hamm.... 464
Nomograph for helical springs. J. S. Swearingen *682
Properties of rectangular sections at any angle *188
Rectangular moments of inertia and section moduli *61
Reinforcement of nozzles in pressure vessels. E. L. Maguire..... 393
Specifications and compositions of magnesium alloys 326
Stress in straight pipes under internal pressure. H. W. Hamm.....*125
Torque-stress-load relationship in bolts and screws. A. H. Korn.....*752
Typical properties of structural magnesium alloys 325
Wiring diagram symbols.....*537
Refrigerator, portable, for U. S. Navy....*625
Research—proposal to nationalize (edit.). 275
Rivet ejector *148
Riveting aircraft simplified with bucking bars *78
Rotors for blowers designed of carbon and molded rubber *339
Rubber problem easing for military needs 393
Rubber—Synthetic rubber in post-war applications 516

S

Sander, portable electric *340
Sapphires, synthetic, produced in U. S...*668
Scheduling plane production aided by accounting system. Paul Sheets.....*400
Screws and bolts—torque-stress-load rerelationship. A. H. Korn (Ref. Bk. Sheets) *752
Searchlight for Army use, redesigned with sheet steel replacing cast aluminum *333
Sheet metal shapes classified as to formability. L. D. Dame, pt. 1, *558; pt. 2 .....*633
Shrink fit tolerances *214
Signal Corps designs new devices.....*195
Simplification and standardization of products 192
Spinning process, tube—tubular parts simplified by *153

SPRINGS:
Commercial tolerances for springs. Harold Carlson 156
Helical compression springs. C. P. Nachod (Ref. Bk. Sheets).....*681
Nomograph for helical springs. J. S. Swearingen (Ref. Bk. Sheets).....*682
Spring material substitutes have unconsidered qualities. W. W. Boyd.*112
Spur gears tentative A.G.M.A. standards for 20 deg. involute fine pitch system 823

Stampings eliminate machining in roller bearing retainers. R. R. Kilian....*504
Standards work can be coordinated with design and production. B. C. Boulton *565
Statistical handling of laboratory data. E. U. Condon..... 615
Steam engines for Liberty ships..... .*138
Steel—Better magnetic core steel aids transformer engineer. C. C. Horstman *28

STRESSES:

Brittle lacquer method for testing stress analysis of engines. R. G. Anderson *611
Effect of material and loading in calculating design stress. G. H. Neugebauer *31
Effects of residual stress on the fatigue of metals. J. O. Almen.....*348
Measurement of stresses in parts and structures. R. G. Anderson.....*712
Stress concentration factors and their effect on design. G. H. Neugebauer, pt. 1, *82; pt. 2.....*168
Stress formulas for non-homogeneous beams. G. W. De Bell.....*782
Stress in straight pipes under internal pressure. H. W. Hamm (Ref. Bk. Sheets) *125
Torsion analysis of open shell structures. E. H. Spaulding, pt. 2..... *25
Stud design *288
Surface plate of constant temperature, reduces gaging rejects *342

T

Testing aluminum parts for working temperatures. R. G. Anderson.....*786
Testing bomb fuzes in wind tunnel. A. L. Atherton *95
Testing designs of machine parts by brittle lacquer method. R. G. Anderson *611
Thermosetting materials covers wide range *223
Tin plating on steel, electrolytic..... *16
Tile blocks—design practice in use of... 284
Tolerance—Commercial tolerances for springs. Harold Carlson 156
Dimensioning to control sizes and to reduce scrap loss. S. C. Bliss.....*108
Torsion analysis of open shell structures. E. H. Spaulding, pt. 2..... *25
Transformer core improvement sought...*230
Tubing of plastic *438
Tubing, square and rectangular.....*418
Tubular aluminum beam loading. Marshall Holt *36
Tubular parts shaped and ends closed by spinning process *153
Tygon—new synthetic corrosion-resistant material *88

V

Valves—Welded valve *81
Vinyl plastics, flexible—abrasion resistance. F. W. Duggan..... *44
Visualizing in three dimensions.....*131

W

WELDING:

Arc-welded design helps reduce weight of large diesel engines.....*176
Arc welding of magnesium sheets.... 50
Castings redesigned as welded stampings *206
Magnesium welded joints.....*574
Specially designed welding equipment assembles auxiliary fuel tanks for planes *479
Thin sheet stainless steel welded into water storage tanks.....*622
Wire magnet coils, fine—corrosion causes and remedies. B. W. Erikson.....*158
Wiring diagram symbols (Ref. Bk. Sheets) *537

X

X-ray table, portable.....*200
